No, no, no no no dont push the Buy button! Oh god how does this get through greenlight. 1h and i already beat the game. And for shure you dont want to play further. By feel there are just 3 Mission wich repeat over and over but with other briefings. No AI, or why is everything crashing into each other? Mission select screen is cut of so you see mission 4 button just half. Please Steam, help them young and unexperienced gamers and delete this! (and this had to come:) But, its faaaaar better than Dubstep Absralsa. Oh. Eh, dont, no dont, dont search for that game. (If you have no money and just want to have 1 or 2 games to flush your time on earth down the toilet, yes, buy this and get as good as you can.. I like trash games very much and i had a blast with this game. So, i recommend this game to all trash fans. But for the others, i say just no, this is a really bad game. In Criminal

Pursuit Force you are a female cop (only visible in the missions screens as a picture) hunting bad guys. The goal of every level is to catch an enemy car with your police vehicle. I like that kind of game and that is why i bought it. But there are so many things that are just awful. The graphics are outdated and there is just one small map (for all missions). There are not many sound effects in the game, just a police-radio, which tells you the same thing over and over, and a police siren. No engine sounds or other effects (maybe that is just a bug). The music is ok, but there are not many tracks. The worst part of the game are the ai-drivers, the normal ones and the enemy. I never saw such stupid drivers in a game, they even can not stay on the road. You have to see that for yourself to believe it (watch may video under the text). And on top of that all, the game is not finishable because in one mission, the enemy car is not findable. So my final verdict for the game, buy it if you want to laugh about the most stupid drivers in gaming history, otherwise avoid it. Gameplay video:
